

Online Grants Management System Login Instructions

All grant requests must be submitted through our online grants management system. Review our [How to Apply](#) section of our website for information about our grant cycles and due dates.

Instructions for Past Applicants

If you previously submitted a grant request to the Foundation your organization has a record in our system. A valid email must be on file to access your organization and grant information. If you believe that you have a user account, log into the system using your email address and select “Forgot Password” to reset your account password.

If you believe you have applied for a grant and are unable to identify the email address used to set up your account, contact the Foundation to create a new account for your organization. Please do not set up duplicate organization accounts.

Account Maintenance

After logging into the system, you will see your dashboard with your organization’s contact information. Edit your contact information including current email addresses and any changes to your organization’s address, phone number, website and executive leadership.

Instructions for New Applicants

If your organization has never applied to the O’Neill Foundation you will need to create a new account. Select “Create New Account” and follow the instructions to set up a new account.
